What's the impact of hermaphroditism? Intrapopulation genetic diversity of helminthes

Invertebrates section

Muséum d'histoire naturelle de la Ville de Genève Route de Malagnou, 1 1208 Genève

Dr. Isabel Blasco-Costa, isabel.blasco-costa@ville-ge.ch, +41224186387

Topics: Evolutionary ecology

Our understanding of the frequency of outcrossing versus self-fertilisation in populations of hermaphroditic parasites is still largely incomplete despite they include medically important parasites. The aim of this project is to bring substantial knowledge on this topic by using wide genomic data.
